PETITION RE IMPROPER FINAL REJECTION

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Applicant herewith petitions Commissioner, under paragraph 37 CFR 1.181a: (i) to instruct Examiner to change his final office action dated 09/26/90 to a non-final office action; (ii) to remove Examiner from the prosecution of instant application.

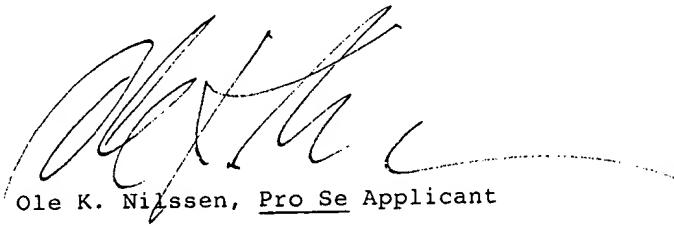

The finality of Examiner's most recent office action is inappropriate for the reason that it contained an initial rejection of claims 139-142. Thus, Applicant was never provided an opportunity to respond to Examiner's initial rejection of these claims 139-142.

In other words, Examiner rejected claims 139-142 without ever providing Applicant with an opportunity to traverse these rejections.

Also, Examiner improperly denied entry of Applicant's Amendment E; which Amendment E -- prior to Examiner's initial rejection -- provided for amendments to claims 139-142.

Also, with reference to the file history of this and other applications of his, Applicant petitions the Commissioner for removal of Examiner Beha from prosecution of Applicant's applications for the following reasons:

- (a) an unusually gross incompetency in respect to the understanding/interpretation of the facts and circumstances associated with the subject matter pertinent to the applications being prosecuted, coupled with an inordinate lack of appreciation of his own incompetency;
- (b) a particular deficiency in the skills needed to advance an application to a fruitful conclusion;
- (c) an inordinately high tendency to resort to technical and other obvious subterfuges in dealing with Applicant; and
- (d) an apparent strong tendency to pursue a personal agenda in conflict with the purposes of the U.S. Patent and Trademark Office.

Ole K. Nilssen, Pro Se Applicant
